What We Do

From Idea to Execution, We
Help Shape Industry Leading
Products

Product Engineering

From idea validation to full-scale deployment, we design and build high-performance software products that grow with your business.

Digital Transformation

PiTangent Enables businesses to achieve 360-degree Digital Transformation- from Cloud Infrastructure and AI Integration to Legacy Modernization- with the transparency and technical rigor enterprises demands.

Application Development

Whether you are building an MVP to validate your idea or modernizing your internal systems, our custom application development services are designed to deliver secure, high-performance & measurable business impact.

Staff Augmentation

We help both Start-ups and Enterprises bridge the talent shortage gap with our tailor-made Staff Augmentation Model. Hire Dedicated Team on short- and long-term basis to fulfil your project backlogs.

Our Services

Digital Transformation –
Delivered

- API & Third-Party Integration
- Server Infrastructure Mapping
- Deployment

DevOps & Cloud:

- CI/CD Pipeline Setup
- Cloud & Infrastructure Management
- Infrastructure as Code (IaC)
- Containerization & Orchestration
- Monitoring & Logging
- DevSecOps Implementation

Value Proposition

Crafted for Client Success

Deep Expertise

- You get a team of specialists – not a generalist wearing every hat.
- Access to niche skill sets (cloud, AI, cybersecurity, DevOps) without full-time hiring

Strategic Partnership

- We don't just execute – we advise.
- CTO-level thinking, technology roadmapping, and long-term digital strategy

Innovation-Led

- We bring emerging tech to your doorstep before your competitors find it.
- AI, automation, and cloud-native solutions that future-proof your business

Security & Compliance

- Your data, protected. Your audits, passed.
- Built-in compliance (SOC 2, ISO 27001, GDPR, HIPAA) with proactive threat management

Speed & Agility

- We cut your time-to-market in half – without cutting corners.
- Rapid deployment, agile delivery, and faster release cycles than in-house teams
